

PGIM RETIREWELL™

CONFIDENCE INDEX

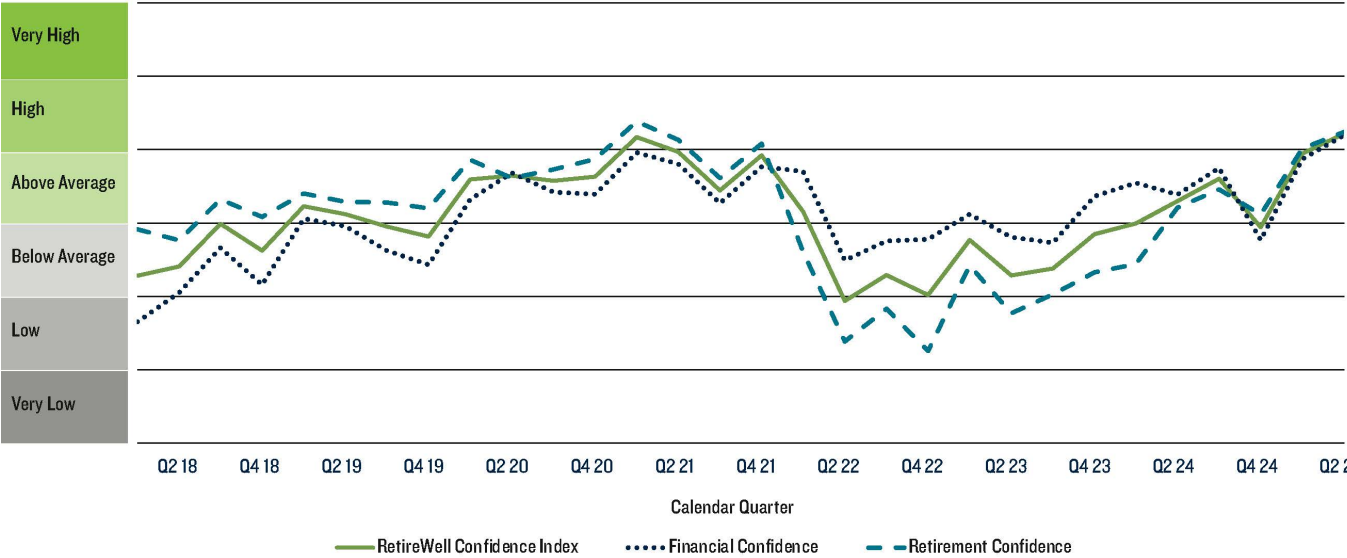

June 30, 2025

The PGIM RetireWell™ Confidence Index is a comprehensive retirement wellness sentiment index that provides an overview of individual perspectives on financial confidence and retirement confidence.

The index is based on responses to an online financial wellness assessment offered by Prudential Financial as well as national online surveys conducted by Morning Consult. Over 300,000 people have completed the financial wellness assessment since it was first offered since April 20, 2017. The Index controls for the demographic factors related to confidence, such as age, income, and gender, and provides context as to how sentiment has evolved over time. There are six potential confidence levels, which are (from best to worst): Very High, High, Above Average, Below Average, Low, and Very Low.
